

Technical Service and Expertise

We are proud to offer over 250 combined years of experience in polyurethane, chemistry, and molding. Customized solutions include product development as well as quick response for processing assistance and problem solving. It is also a comfort to know that technical service at the customer site is just a few hours away.

Customer Service

Our friendly and knowledgeable customer service team members provide personal service to every customer regardless of the size of the order and serve as a liaison between customers, technical service, production, and shipping to get products delivered on time.

Corporate Overview

Building Partnerships for Success

As a full service provider to the urethane industry, our goal is to partner with customers by providing the right combination of chemicals, machinery and service to maximize the success of the customers' products in their respective industries. Prototype molding, training, technical service, and new formulation development are offered by ITWC, Inc. to ensure the best urethane solutions for each customer and product.

Top Quality Products for Polyurethane Systems:

- Prepolymers – MDI, TDI, HMDI, IPDI
- Quazi-Prepolymers – MDI
- Modified MDI – polymeric, monomeric
- Polyesters
- Extenders
- Catalysts and Additives
- Customized Polyurethane Systems
- Thermoplastic polyurethane (TPU)

Custom Blends and Formulation Development

One of ITWC, Inc.'s strengths is the ability to custom blend and produce products for specific customer applications.

We work closely with our customers to confidentially develop urethane solutions to help them excel in their businesses.

Superior Machines for Processing Polyurethane:

- Mixing/Metering Machines
 - M, MX, and MX II series
- Auxiliary Equipment
 - Tanks
 - Hot Tables
 - Ovens
 - Conveyors
- Bulk Storage Systems

The History of ITWC, Inc.

Founded in 1988 in central Iowa, ITWC, Inc. began by producing prepolymers with one reactor for a manufacturer of tires for fork trucks. Polyurethane molding machine manufacturing was added to the product line and we have expanded capacity several times over the years to accommodate needs of customers and their continuing growth.

Current capacity is 100 million pounds:

- 12 reactors ranging in size from 500 to 6,000 gallons in Iowa
- 8 reactors from 600 to 2,500 gallons in Georgia
- 6 reactors in our pilot plant for smaller batches
- A state-of-the-art polyester production facility completed in 2005
- 14 bulk storage tanks ranging from 4,500 to 18,000 gallons for storage capacity of 1,250,000 pounds
- 2 blend tanks holding 8,500 gallons each
- Annual TPU capacity of 3,500,000 pounds

We continue to add to our product line to support customers with top quality urethane systems, machinery, and technical service.
